YAEL GARCÍA FRANCO
JUNIOR DEVELOPER

Profile

I am a student at the Technological University of Tulancingo, and I have been attending it since 2019, with a graduation date set for 2023.

Currently, I have projects uploaded on Github where I can demonstrate my technological abilities.

My goal is to improve my programming abilities and contribute to the development of high-quality software.

Strategies to achieve this goal:

To learn and master new technologies and programming languages relevant to software development.
Participate in open source projects to improve my programming skills and contribute to the developer community.
Collaborate with other developers and share knowledge and techniques to improve software quality.
Continuously learn and keep myself updated on current trends and practices in software development.

I believe that everything can be learned, and that is why I love my career.

Experience

● **DEVELOPER C# .NET**
Instituto Universitario de Ciencias Ambientales, Tulancingo, Hidalgo | 09/2021 - 12/2021
To improve project management, I developed a dynamic dashboard.

Education
